That is correct. The figure really is only intended to indicate which foundations/excavations will take place entirely within the imported clean fill or area of previous clean-up. Excavations in areas outside of that boundary are considered to likely encounter contamination.

Thanks for getting to this Joyce.  
Brian King

I am reading the workplan as we speak. I have a question on Figure B "Foundations and Clean Fill." This is a very helpful drawing, by the way. The drawing shows the clean fill boundary line where the excavation was a minimum of 8 feet deep. I assume that the foundations, vaults and equipment that are outside this boundary line are assumed to be in contaminated soils and that work in these areas will follow all the asbestos work procedures identified in the workplan. Can you confirm if that's correct?

Thanks!

Thanks Joyce.

Fitting it in this week that would be preferred so it coincides with our project schedule. Scheduling these projects is pretty complex as we can

only take power outages at certain times and we have a tight window that we are up against so it is definitely a balancing act. Because of the tight schedule we are going to bid the project this week to start the selection process of a construction contractor, so coming to an agreement regarding the work plan this week is preferred if possible.

We are looking for approval of the work plan and associated documents with the understanding that the work plan is a living document and control measures will be modified and new measures implemented as necessary under the direction of the onsite Health and Safety Manager. We believe the work plan outlines guidelines from which the construction contractor may further develop control measures as well as specifically address required measures.

This being said, work will not proceed until we have an approved work plan.

Again, thank you for your time and effort and we look forward to hearing from you.

Hi Brian - If I can get to it this week, I will. I have field work and training scheduled for the next few weeks, so I can't give you a specific date.

Thanks!

Thanks Joyce.

I know that you are busy, but when can we anticipate receiving feedback or approval from you on this second go around?

I appreciate your time in this regard.

Brian King

RE: PacifiCorp -

Joyce:

I just wanted to make sure that the email below with attachments came through on your end okay. If not, please let me know and I will resend them.

Craig:

We look forward to receiving your comments next week.

Thanks,

Importance: High

Joyce and Craig,

Please see attached, the second submittal of the Work Plan and associated documents regarding the facility upgrades at the Third West Substation property contaminated with Libby Amphibole. Attachments include:

- Work Plan with the following appendices
  - Appendix A: Figures and Construction sequence
  - Appendix B: Scope of Work
  - Appendix C: Sampling and analysis Plan
  - Appendix D: Site Health and Safety Plan

We apologize for the time that has transpired since the first submittal and lack of notice for this submittal. We look forward to your review and approval of the attached documents.

Please reply to this email indicating when we may expect this second review to be completed by you and/or your staff.

We appreciate the collaboration we have received in working with you through this effort.

Sincerely,  
Brian King
